

Unitale AI Audiobook Maker

Demo Videos:

An AI-driven audio & video story creator powered by LLMs and TTS.

English Video

Chinese Video

LLM Fully Drives

An intelligent LLM acts as the ultimate director, automating all text analysis, audio synthesis, and scene arrangements without manual alignment.

IndexTTS2 Cloning & Synthesis

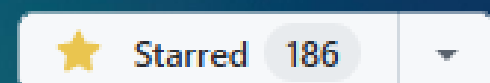

Ensure high-quality voice generation. Clone any character's voice and precisely customize the emotional delivery for every single line of dialogue.

Smart Mixing

BGM + SFX + Filters

The AI intelligently matches BGM, sound effects, and voice filters (e.g., phone calls, underwater) into a seamless audio track.

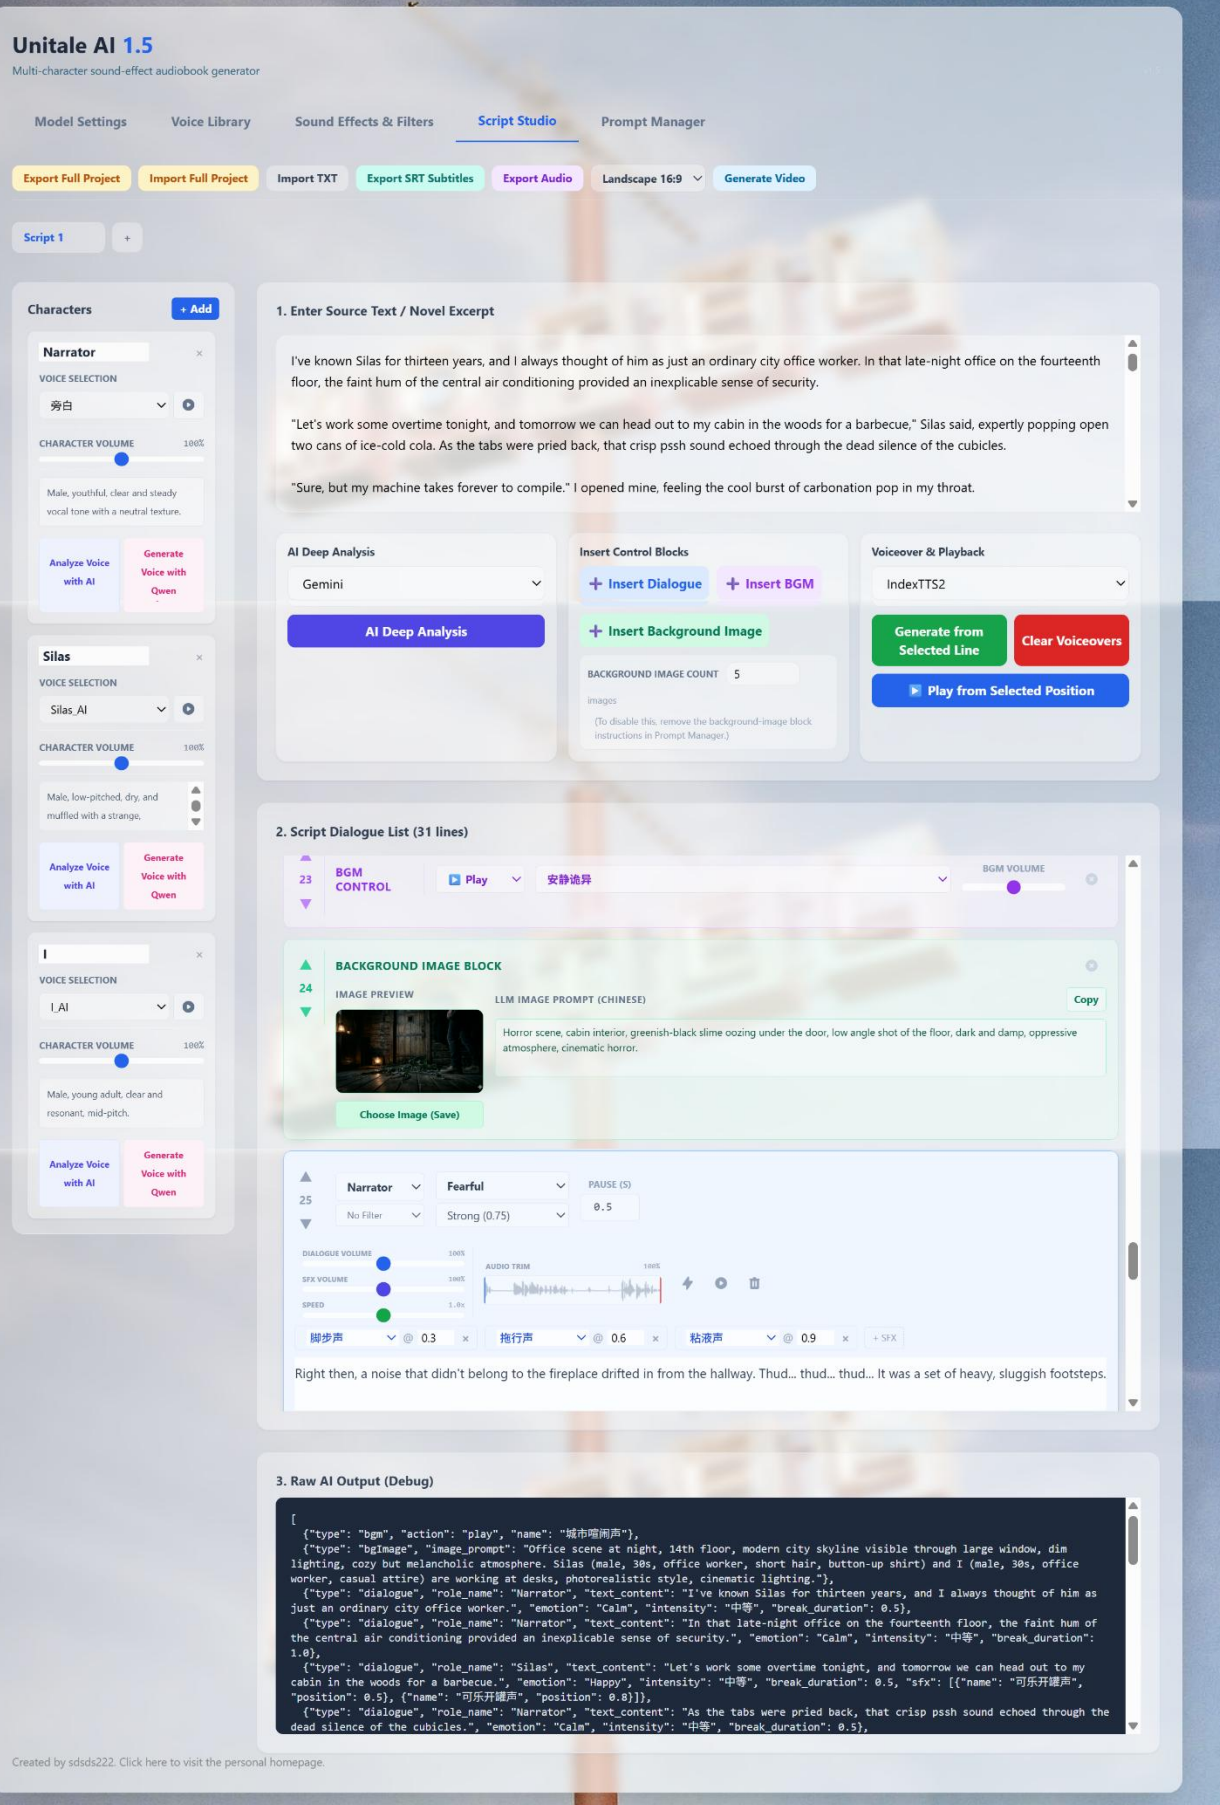

Github Repo (MIT license):

Video Prompt generation

Automatically generates background image prompts based on the novel's context, maintaining consistent art styles and character outfits. Export the final audiobook video directly as an MP4 video.
